

## How to set up Face time with your iPhone iPad or iPod By Ethan Osterhage

To use face time you need to set it up in settings.

Then you select use apple I.D.

Sign in.

Use both your phone number and email.

Turn face time on. By having your phone number and your email in there all of your contacts will transfer over.

Now select your phone number for caller ID so people know it's you calling. Make sure it's set up under your email.
